

LONG-TERM RESISTANT UP TO 280 °C

Application example

FURAN RESIN WITH EXCELLENT THERMAL RESISTANCE

FURADUR HT

Available product variants:

Laying and grout cement

Main features:

- Excellent temperature resistance (dry)
Long-term up to 280 °C
Short-term up to 350 °C
- Low shrinkage
- Very good resistance against mineral and hydrofluoric acids
- Long storage stability of the components, resistant against higher temperatures during transport and storage
- For ceramic or carbon bricks

Scope of application:

- Areas with high thermal load
- Areas with high thermal and / or inorganic chemical load
e. g. quencher or venturi
